

Benefits

Prevent Breakdowns

A pre-season checkup can catch problems like refrigerant leaks or a faulty motor early, reducing the chances of further problems down the road. One issue can sometimes lead to another, because it puts stress on the entire cooling or heating system.

Save Time, Stress, and Money

Aside from the time and stress you'll save by avoiding emergency repairs later, you can save you up to 30% on your energy bills. When you consider the fact that more than half of your home's energy costs are for heating and cooling, improving your air conditioning and heating efficiency is a worthwhile investment.

Extend the System's Lifespan

Just as regular oil changes help to keep your car running smoothly for years, annual maintenance will help your air conditioner have a longer usable lifetime. Keeping the unit free of dust and dirt and ensuring all parts are lubricated and working properly will help you avoid the expense of replacing your heating and cooling system.

Meet The Owner

John Intondi

John is a family man who started Patriot Air solutions in 2021. He's been in the industry for 13 years and plans to grow Patriot Air Solutions in the coming years off the foundation of his core values of striving for perfection, great customer service, affordability, and to be a knowledgeable employer.
